

GRASSLAND SOCIETY OF SOUTHERN AFRICA

STRATEGIC PLAN: JUNE 1998

Mission

The GSSA is an autonomous body providing a forum to stimulate exchange and dissemination of information in the field of range and forage science and management, and is committed to promoting and advancing the science and to the development of human resources to ensure sustainable use of natural resources.

Sub vision: International and National Environment

A credible and effective body influencing national and international policy and its implementation on range and forage resources.

Sub vision: Relevance and Recognition

We are recognized and consulted by national and international government, media, education institutions and industry as the main body with the relevant tools, products and expertise for southern Africa's range and forage management needs and priorities.

Sub vision: Membership

We are the main home for the full diversity of professional range and forage practitioners (scientists, educators & students; extension officers; advisor consultants and managers) in southern Africa.

Sub vision: Products and Activities

Our products and activities efficiently and effectively promote and advance the sustainable use of natural resources (relevant to R & F).

Sub vision: Financial

To optimally use and sustainably manage the financial resources to achieve the visions outlined above.
